
Arbeiten in Agentischen Teams

Wie ich heute allein produktiver bin als mit fünfzehn Mitarbeitenden.

Kurz zu mir

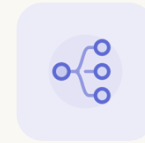

Gründer von Kern AI

2020 gegründet, 2025 an accompio verkauft.
Namhafte Kunden: HDI, BMW, Generali, Markel uvm.

Ab Juli: Confidential AI

Ab kommendem Monat VP Growth bei Privatemode AI

Ab nächstem Jahr: weitere Gründungen...

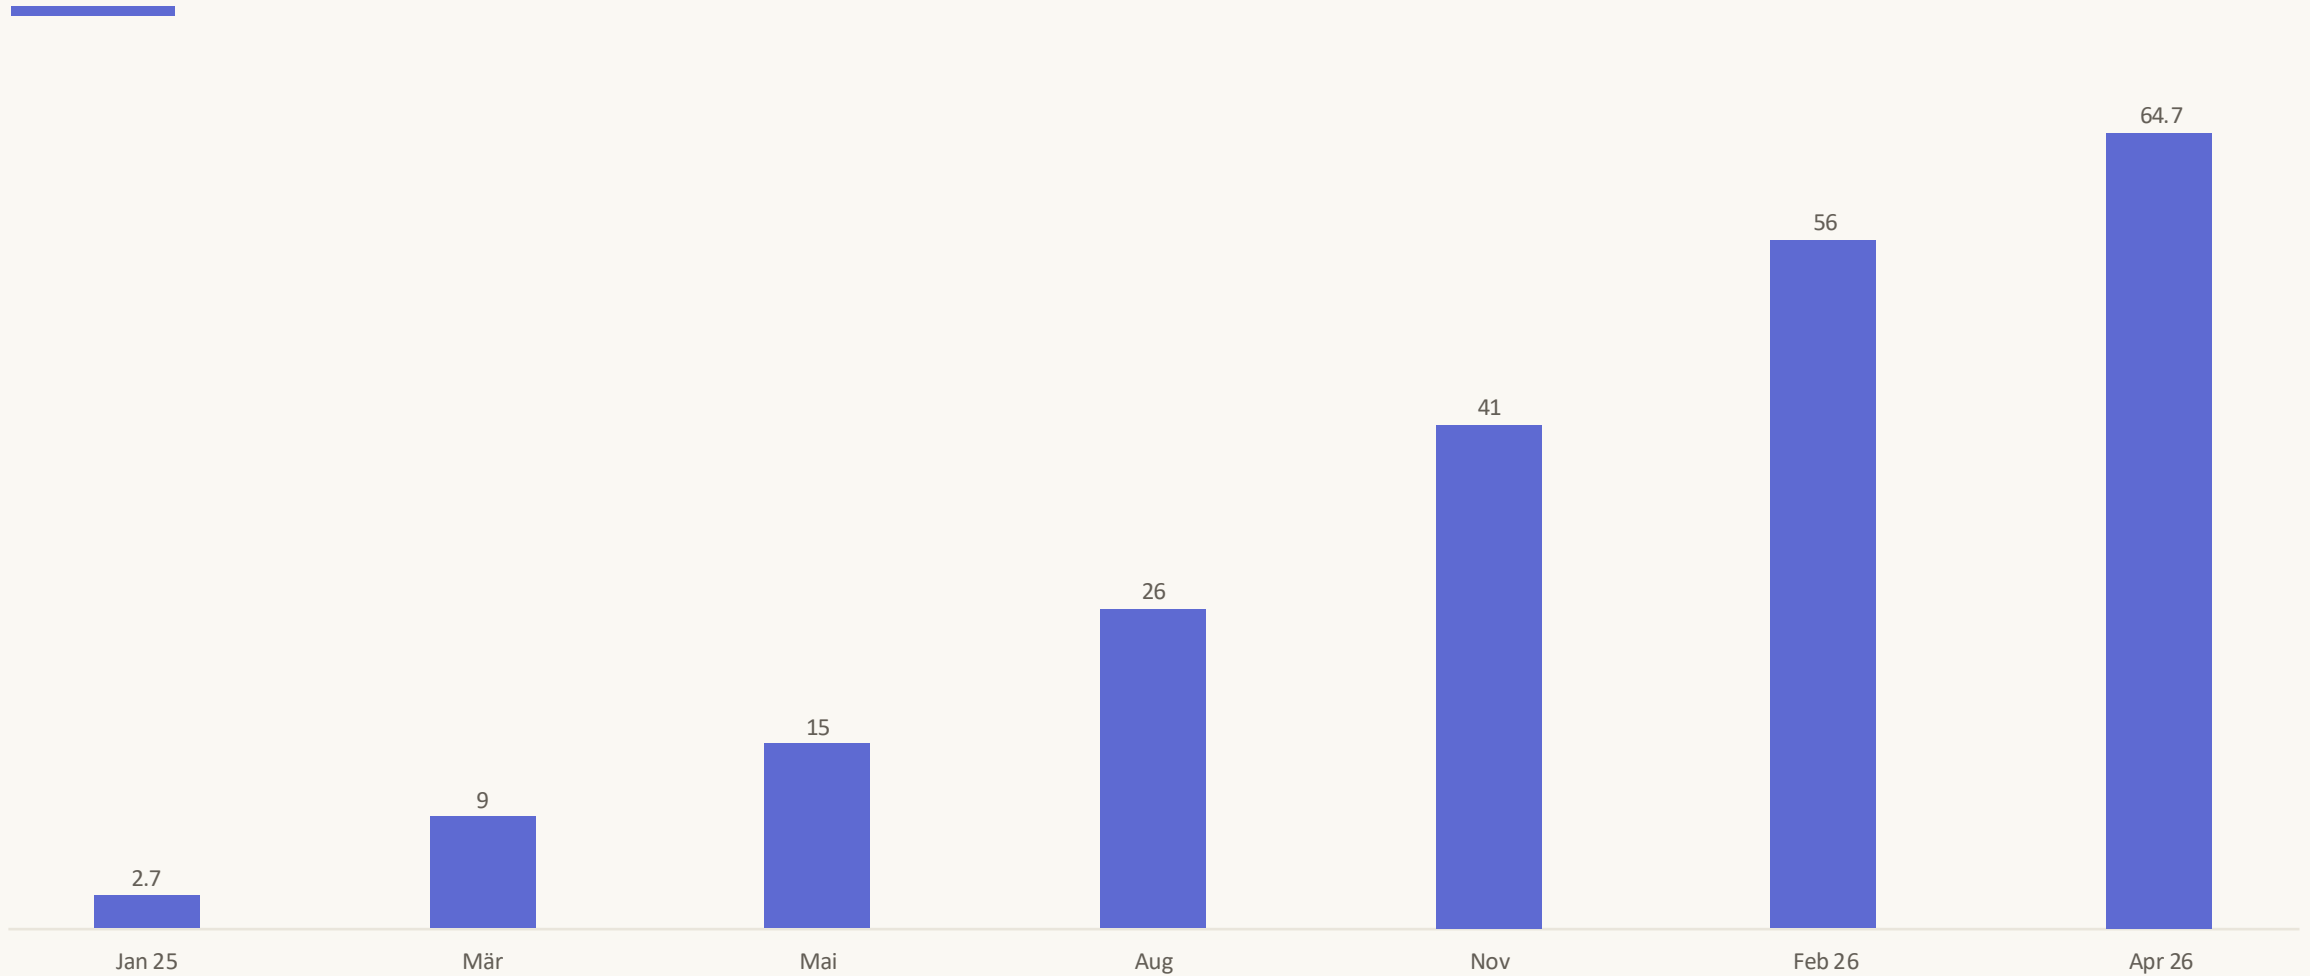

24/7 Experimente und Studien, künftig werden weitere Gründungen folgen...

00

Kurzer Status Quo: wo steht KI?

Wie gut ist KI heutzutage?

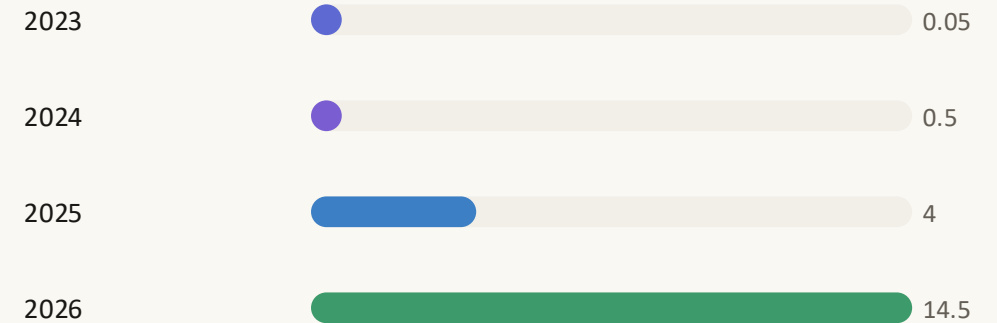

00 Humanity's Last Exam: von 2,7 % auf 64,7 % in 15 Monaten

Der härteste Benchmark der Welt: Experten-Fragen am Rand des Wissens. Quelle: Scale AI HLE Leaderboard. Verlauf illustrativ.

Zeit, die KI autonom durcharbeitet, verdoppelt sich 89 Tage.

- Heute trägt ein Agent rund 14,5 Stunden eigenständige Arbeit am Stück.
- Darum wird aus dem „Copilot“ ein „Kollege“.
- Und darum sitze ich nicht neben einer KI, sondern führe mehrere.

01

Aus der Praxis

Was sich für mich ganz konkret verändert hat.

Früher: 15 Mitarbeitende. Heute: ich und zahlreiche KI-Agenten.

- Zwei Max-Subscriptions (Claude und Codex) plus ein paar kleinere Tools.
- Höhere Produktivität als jemals zuvor: schnelleres Feedback, fast überall bessere Qualität.
- Und deutlich weniger Kommunikations-Overhead.

01 Wie viele Token dabei durchlaufen

01 Was ich in 24 Monaten in KI investiert habe

Alle meine KI-Ausgaben der letzten zwei Jahre zusammengerechnet: ungefähr ein gebrauchter Volvo XC40.

Aufbauen, abreißen, neu aufbauen.

- Wie ein Haus, das ich an einem Tag hochziehe, verwerfe und besser neu baue.
- Die Iterationsgeschwindigkeit ist so hoch wie nie zuvor.
- Verwerfen kostet fast nichts mehr — also probiere ich Varianten, statt lange zu planen.

01

Und ehrlich: da entsteht viel

Ein Querschnitt aus den letzten Monaten.

Das Prinzip

Jede Aufgabe wird zuerst agentisch versucht. Jede.

Kann ich diesen Teil nicht mit KI lösen?

- Bei jedem Schritt der erste Gedanke. Immer.
- **Meist kann sie das auch noch besser als ich!**
- Sobald etwas Struktur hat, ist es Code. Und Code macht der Agent.

num

01

Kleine Nummer

01 Humanity's Last Exam: von 2,7 % auf 64,7 % in 15 Monaten

Der härteste Benchmark der Welt: Experten-Fragen am Rand des Wissens. Quelle: Scale AI HLE Leaderboard (CAIS + Scale AI). Verlauf illustrativ.

Arbeiten in Agentischen Teams

“

All tasks that are possible to solve and easy to verify will be solved by AI.

03

Größer gedacht

Warum jetzt das System-Denken entscheidet.

System-Denken ist Pflicht, nicht Kür

Ein Design-System

Eine einzige Quelle der Wahrheit, an die sich alle Agenten halten.

Ein Aufgaben-Tracker

Ordnet die Arbeit über alle Agenten hinweg — Status und Verantwortung sichtbar.

Über das Coding hinaus

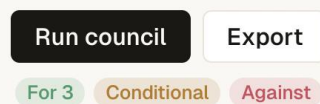

Es bleibt nicht beim Code — andere Bereiche kommen als Nächstes.

The single source of truth for building consistent Sonalooop experiences — the React marketing site and the Python-SSR inspector, skinned from one set of tokens, icons and components.

Icons

A stroke icon set tailored for research & council tools.

Colors

A near-white warm light + cool dark, accessible system.

Warum gerade jetzt so viel möglich ist

Bestehendes neu bauen — Cleanroom Engineering

- Design ist klar / bekannt
- Hochgradig automatisierbar
- Nahezu keine Grenzen mehr, was möglich ist

Etwas Neues erschaffen

- Hier steckt die eigentliche Arbeit: Design und Konzept
- Was soll es können — und wie soll es sich anfühlen?
- Viel Iteration an UX, Form und Details

Ich baue keine Software mehr, die nicht agentisch nutzbar ist.

- Jede neue Funktion bekommt API, MCP und CLI. Bedienbar von Mensch und Agent.
- Wer in zwei Jahren keine agentische Schnittstelle hat, ist für diese Workflows unsichtbar.

Law of Amplification: Bald kommt der 100-fache Durchsatz. Wie halten wir dabei die Qualität?

- Wenn die Maschine 100× mehr produziert, wird die Qualitätssicherung zum Engpass.
- Genau daran arbeite ich gerade mit meine nächsten Projekt sonalooop.
- **Meine Frage: wenn Durchsatz 100x wird, wie kann das Design mithalten?**

Victor Ivanov
Refrigeration engineer, on-call · 30

Emergency callouts to Mannheim supermarkets with heavy tooling; no plannable end to the day, breaks follow the compressors.

on-call physical-work unplannable

Erik Janssen
Dual-track business student · 22

Competitive rower needing ~4,000 kcal a day; eating is a logistics problem between training blocks.

athlete high-volume tight-schedule

Dragan Ilic
Truck washer · 48

Truck-stop washing bays on the Lower Rhine — wet clothes, shift noise, a cash budget, and a son back in Serbia.

shift-work tight-budget

remote-family

Iris Baum
Florist, own shop · 60

Runs her own Lübeck flower shop through seasonal peaks with cold hands, rent pressure, and a household of one since being widowed.

self-employed seasonal-peaks

solo-household

Sandra Kruse
Freelance midwife · 39

On-call life: meals drop the moment the phone rings — survives on muesli bars from the glovebox.

on-call unpredictable family

Adriana Popescu
Domestic helper, three households · 44

Commutes by bus and metro between private households in Nürnberg, minds mini-job limits, and cares for her mother-in-law on the side.

multi-site commuter care-duties

Diana Neubert
Content moderator · 26

Queue pressure and distressing content in Essen; the job follows her home into a young relationship.

queue-pressure emotional-labour

screen-work

Tobias Mertens
IT administrator · 43

Server operations with on-call duty and a migration running in Wolfsburg; the ticket queue fills faster than he can empty it.

on-call ticket-queue it-ops

Nadja Kowal
Debt counsellor · 44

Case files, crisis conversations and tightly packed appointments in Dortmund; pauses vanish into other people's emergencies.

emotional-labour back-to-back

public-service

Ali Hassan
Falafel-shop owner · 33

Plates hundreds of meals a day for other people; eats his own standing up — leftovers, mid-afternoon.

Markus Steiner
Police officer, patrol duty · 38

Rotating patrol shifts; meals follow the callout board — often a petrol station after midnight.

Holger Renz
Waterworks technician · 59

On call for burst mains in Kassel, hiking on a worn-out knee, while his wife carries the care for her mother.

REPORT

Schichtübergabe ohne Informationsverlust — Report

Which shift-critical context is currently lost between late shift, morning shift, and operating shift?

WHAT THIS COUNCIL FOUND

Discovery angle 1 found that the handover artifact must be exception-focused and owner-led, not a general report.

SENTIMENT OF THIS COUNCIL

Voices across this session — who supports, who is skeptical.

Skeptical / opposed

2

Neutral

1

VOICES

An open discovery round — we listen to what 4 personas actually experience. No hypothesis, no vote; the answers below are the research data.

QUESTION 1

2

Which handover details disappear?

Janine Wolf

Skeptical / opposed

Vollzeit im Wechselschichtmodell (7-16 oder 11-20), lebt mit ihrem Freund Sven in einer Mietwohnung in Gelsenkirchen-Buer · Isst,

If the Friday handover says “Briefwelle laeuft weiter” but not who checks Pawel, Brandt and Cetin next morning, I am back in Outlook and Genesys reconstructing the day. The context that matters is owner, deadline and what already changed.

Drew on: Janine 2026-06-11 Tagesabschluss with next-day follow-ups

TD

Tarek Demir

Skeptical / opposed

Shift lead at a warehouse site; coordinates ten workers and hates tools that turn into homework after the late shift.

Late shift problems get lost when they are written for management instead of the next lead. I need the one issue that blocks shift start, what was tried, and who is taking it. Anything else becomes homework.

Drew on: Tarek profile: late-shift issues forgotten by morning

Documentation

Feedback

Take the tour

Auch die Schnittstelle verschiebt sich: Sprache statt Tastatur und Maus.

- Ich diktiere Kontext und Ziel schneller, als ich ihn tippen könnte.
- Maus und Tastatur waren für das Bedienen von Software gemacht, nicht für das Führen von Agenten.
- Je mehr ich delegiere, desto mehr wird Reden zur eigentlichen Eingabe.

**Heute: ein Mensch, viele Agenten.
Morgen: ? Menschen ↔ ? Agenten.**

- Agentisches Arbeiten bleibt nicht für immer eine Einzelperson mit ihren Agenten.
- Im Beruf arbeitet niemand wochenlang allein — wie kollaborieren mehrere Menschen mit vielen Agenten?
- Wer koordiniert, wer verantwortet? Das ist die offene Frage, mit der wir uns jetzt beschäftigen sollten.

Nehmen Sie eine Aufgabe und fragen Sie: Kann ich das nicht agentisch lösen?
